CURFEW

**SUNDAY-THURSDAY 11: 00 P.M.
FRIDAY & SATURDAY 12:00 MIDNIGHT
JUVENILES UNDER 18 MUST BE HOME BY THE CURFEW HOUR**

The Board of Directors, Hide-A-Way Lake Club, Inc. finds and determines that special and extenuating circumstances presently exist within the Hide-A-Way Lake subdivision, hereinafter referred to as the "subdivision", that call for special rules and regulations governing minors within the subdivision in order to protect minors from each other and from other persons on the street during the nocturnal hours, to aid in crime prevention, to promote parental supervision over minors, and to decrease nocturnal juvenile vandalism and crime rates; and prudence dictates that preventive measures be implemented throughout the subdivision.

THEREFORE, the Board of Directors of Hide-A-Way Lake Club, Inc., does adopt the following:

SECTION I. That the following text is hereby made a part of the Rules and Regulations governing the Hide-A-Way Lake Club, Inc. and the subdivision.

- A. **Short Title.** These rules and regulations shall be known and may be cited as the "Curfew Rules".
- B. **Purpose and Findings.** In accordance with the prevailing community standards, regulations for the conduct of minors on streets at night, effectively and consistently enforced, for the protection of the younger children in the

subdivision from each other and from persons on the street during the nighttime hours, the enforcement of parental control of and responsibility for their children, the protection of the public from nocturnal mischief by minors and adults, the reduction in the incidents of juvenile criminal activity, for the furtherance of family responsibility, and for the public good, safety and welfare.

C. **Definitions.** For the purposes of the curfew rules, the following terms, phrases, words and their derivations shall have the meaning given herein. When not inconsistent with the context, words used in the present tense include the future, words in the plural include the singular and words in the singular number include the plural. The word “shall” is always mandatory and not merely directory.

1. **“Minor”** is any person under the age of eighteen (18) or, in equivalent phrasing often herein employed, any person seventeen (17) or less years in age.
2. **“Parent”** is any person having legal custody of a minor (i) as a natural or adoptive parent; (ii) as a legal guardian; (iii) as a person who stands in loco parentis; or (iv) as a person to whom legal custody has been granted by order of the court.
3. **“Remain”** means to stay behind to tarry and to stay unnecessarily upon the streets. To implement that thought with additional precision and precaution, numerous exceptions are expressly defined in subsection E.
4. **“Year of age”** continues from one birthday, such as the seventeenth to (but not limited the day of) the next, such as the eighteenth birthday, making it clear that seventeen (17) or less years of age is hereby treated as an equivalent to the phrase “under eighteen (18) years of age”.

D. **Curfew for Minors.**

It shall be a violation of the rules for any person under eighteen (18) to be in or remain in or upon the streets of the subdivision at night during the period beginning at 11:00 p.m. and ending at 5:00 a.m. on Sundays through Thursdays and beginning at 12:00 midnight and ending at 5:00 a.m. on Fridays and Saturdays.

E. **Exceptions.** In the following exceptional cases a minor on a subdivision street during the nocturnal hours for which subsection D is intended to provide the maximum limits of regulation (and a clear guide for minors, their parents and fellow citizens) shall not, however, be considered in violation of the curfew rules.

1. When accompanied by a parent of such minor.
2. When accompanied by an adult (**21 years or older**) authorized by a parent of said minor for a designated period of time and purposes within a specified area.
3. When returning home, by a direct route from (and within 45 minutes of the termination of) a school activity, or any activity of a religious or other voluntary association.

4. When authorized, by special permit issued by the General Manager, Hide-A-Way Lake Club, Inc. permit to be issued in the presence of and with the approval of a parent.
5. When the minor carries a card issued by the General Manager, Hide-A-Way Lake Club, Inc., and which is valid for a period of six (6) months when current facts so warrant, the card to identify the minor, the address of his residence, his place and hours of employment.
6. Special Permit Cards shall be issued only for the purpose of allowing a minor to engage in employment, which would require the minor to be in transit during the curfew hours. Cards shall not be issued to minors for the purpose of compromising the integrity of the Curfew Rules.

F. **Parental Responsibility.**

It shall be a violation of the rule for a parent having legal custody of a minor normally to permit or, by inefficient control, to allow such minor to be or remain upon any subdivision street under circumstances not constituting an exception to, or otherwise beyond the scope of, the curfew rule. The term “knowingly” includes knowledge which a parent should reasonably be expected to have concerning the whereabouts of a minor in that parent’s custody. It is intended to continue to keep neglectful or careless parents up to a reasonable community standard of parental responsibility through an objective test. It shall be no defense that a parent was completely indifferent to the activities or conduct or whereabouts of such minor child.

G. **Security Enforcement Procedures.**

1. The Security patrol or the Sheriffs Deputies patrolling the streets of the subdivision, upon finding or having attention called to any minor on the streets in prima facies violation of the curfew rules, shall take such action as is appropriate under the rules and regulation of the Hide-A-Way Lake Club, Inc. Through the Incident Review Panel System implemented by the Board of Directors, Hide-A-Way Lake Club, Inc. the parent and minor shall be afforded due process.
2. In the case of a first violation, the Security Officer shall escort or transport the offender to his/her residence and release to the custody of the parent, legal guardian, a person who stands in loc parentis or a person who has been granted legal custody by order of the court.
3. The person receiving custody of the minor shall sign the incident report accepting such custody and acknowledging an understanding of the nature of the offense.
4. In those cases where there is no person, as defined in number two (2) herein, to accept custody of the minor, either at home or at another location within the subdivision, such minor, if under the age of thirteen (13), shall be transferred to the custody of the Sheriff’s Department.

5. In ALL cases involving a violation of the Curfew Rules, and incident report shall be executed outlining the details of the investigation. In those cases involving multiple offenders, one report will suffice; however, each person receiving custody of the minor will be required to sign the report acknowledging custody of the minor.

H. **Penalties.**

Prevailing community standards, and the real internalization thereof, or interpersonal sanctions therefore that in practice count for such, as to when minors should be off the streets, reflected in the curfew rule, are hereby under girded with the following legal sanctions. Penalties shall be assessed in accordance with provisions of the Rules, Lake Violations and Administrative Fees, latest revision. Any appeal of violation shall be conducted through the Incident Review Panel System; forms for such appeal can be obtained at the Hide-A-Way Lake Club, Inc. Lodge Office during normal business hours.

SECTION 2. For good cause being shown and in the interest and welfare of the Hide-A-Way Lake subdivision and the citizens thereof, upon adoption on October 13, 2004 by the Board of Directors, Hide-A-Way Lake Club, Inc., this rule shall be in full force and effective immediately.

THE HIDE-A-WAY COMMUNITY **HURRICANE EMERGENCY PLAN**

I. PURPOSE:

The purpose of this plan is to establish procedures whereby Management can take the appropriate steps to protect property under the control of the Hide-A-Way Board of Directors and to furnish information to the Property Owners of the Hide-A-Way Community to assist them in the event that the area is struck by a hurricane or other disaster.

II. DEFINITIONS:

A. Storm Terms

Tropical Wave - An open system accompanied by disturbed weather that has a Potential to form into a tropical depression.

Tropical Depression - A mild stage of a potential hurricane that has a definite closed circulation and highest wind velocities less than 40 mph.

Tropical Storm - A weather disturbance that has a definite closed circulation with highest wind velocities less than 74 mph.

Hurricane - A weather disturbance that has a definite closed circulation with winds in excess of 74 mph.

Weather Advisory - A formal advisory message from a Weather Bureau Hurricane Warning Center giving details on storm location, intensity and movement and precautions that should be taken.

Weather Bulletin - A public release for press, radio and TV from a Weather Bureau Hurricane Warning Center giving latest information on a disturbed area of tropical weather. They are issued at times other than those when advisories are required and will increase in frequency as the storm intensifies and/or approaches land fall.

Hurricane Watch – A watch indicates that an announcement for specific areas to which hurricane conditions poses a threat to coastal and inland communities. All people in this indicated area should take stock of their

preparedness requirements, keep abreast of the latest advisories and bulletins and be ready for quick action in case a warning is issued.

Hurricane Warning - A warning that one or more of the following dangerous effects of a hurricane are expected in a specified coastal area in 24 hours or less:

1. Hurricane force winds.
2. Dangerously high water or a combination of dangerously high water and exceptionally high waves. Warnings customarily indicate recommendations for evacuation of threatened areas and are the basis for the detailed evacuation advice issued by local officials.

B. Evaluation of Severity of Storms

The Weather Bureau has established a rating system to determine the severity of storms so that the public can be made aware of what courses of action to take in the event a storm hits.

Category 1 - A minimal hurricane with wind just over 75 mph.

Category 2 - Moderate. Winds are below 100 mph.

Category 3 - Moderate to Severe. Winds could be expected over 100 mph, but storm surge not as severe as Category 4.

Category 4 - Severe. Hurricane Betsy fits this category.

Category 5 - Most severe. Extremely destructive. Hurricane Camille fits this category.

III. GENERAL INFORMATION:

- A. *Floods* - The major cause of deaths, injuries and destruction due to hurricanes is flooding. Flooding may come in the form of a tidal surge sending a wall of water across shores and inland. In June of 1957, flooding accompanying Hurricane Audrey along the Louisiana/Texas coast caused some 390 deaths. In September, 1965, flooding during Hurricane Betsy caused the shore tides to be 10 feet above normal, causing a total of 59 deaths. Flooding accompanying Hurricane Camille extended from Northwest Florida to Southern Louisiana. The highest water level reported was 24.2 feet in Pass Christian.
- B. *Winds* - The area of destructive winds in a hurricane varies considerably. In small storms, the area may be only 15 miles, while in massive storms the area may be 300 miles or more. It is estimated that the average is 50 to 100 miles. The length of time that hurricane winds persist depends on the size of the storm and its forward velocity. Hurricanes tend to slow down as they approach landfall and may loiter offshore for hours or in some extreme cases, for days or more parallel to the shore until they eventually move inland.
- C. *Tornadoes in Hurricanes* - There are many instances of tornado occurrences associated with hurricanes. These winds seem to precede the arrival of the

actual hurricane and are “spin offs” of the main storm. Poplarville was damaged by tornadoes on October 3, 1964, when Hurricane Hilda moved toward the Louisiana Coast.

- D. *Hurricane Rains* - Some of the world’s heaviest rains have occurred in connection with hurricanes. The rainfall is always heavy, probably three to six inches on the average, and frequently much more. It is quite likely that the exact amounts of rainfall in these storms are never known, since after the wind reaches 50 mph it is impossible for rain gauges to “catch” all of the rain. Consequently, it is probable that a measure of five inches of rain in a hurricane may in reality be as much as 8 inches or more.
- E. *Plotting the Hurricane* - Hurricane Tracking Charts are available from many sources - TV stations, weather bureaus, newspapers, etc. The best types to get are those that take in the Windward Islands (Barbados). All TV and most of the radio stations give coordinates (Latitude and Longitude) whenever a tropical disturbance is picked up by satellite or as the storm begins to take shape and is potentially dangerous, weather bulletins are issued at a frequency commensurate to the degree of the storm threat. As the storm approaches a specific land area, bulletins are issued every two hours.

Tracking hurricanes on a map is both informative and interesting as you can plot the location of the hurricane and determine its general direction. Some “rules of thumb” in plotting are:

1. One degree of latitude equals approximately 60 miles, as the storm moves into the Gulf.
2. The coordinates record the location of the “eye” of the hurricane. For a major storm, gale winds extend out as much as 150 miles from the “eye,” which means that high winds could hit land as much as 12 hours before the “eye” comes ashore. Weather bulletins will tell you the extent of gale winds accompanying a hurricane. A transparent overlay, scaled to fit your map will tell you, fairly accurately, the extent of the storm.
3. Hurricane winds are counter clockwise. The highest winds occur in the northeast quadrant. If the storm has a forward motion from 12 - 15 mph or more, it indicates that it has a “clean” path and will probably follow this track. If the forward motion is slowed to 5 mph or below, it indicates that the storm will probably change direction.

IV. HURRICANE ALERT CONDITIONS:

Condition V - The hurricane season starts officially on June 1st and ends November 30th. Condition V is therefore automatic. On June 1st Management should:

1. Take stock of what emergency materials might be needed and store these in a readily accessible warehouse.
2. Make a detailed survey of the drainage system to assure that there is no blockage of any main drain that removes water from Hide-A-Way property. Remove blockages where it occurs.
3. Check the well machinery to be sure that it is in first class condition for the dispensing of portable water. Check the emergency pump and test it to be

sure it can be activated in the event of power failure. Assure that sufficient fuel is on hand to operate the emergency pump for days or even weeks.

4. Contact the Picayune/Carriere Civil Defense Organizations to coordinate activities in case of a hurricane.
5. Contact Coast Electric Power Association personnel to determine whom should be called in the event emergency assistance is needed.
6. Check all two-way radios to assure that all are operable and have sufficient spare batteries.

Condition IV - Hurricane winds are expected within 72 hours.

The Manager will review all items listed under Condition V to determine the state of readiness of each and establish contact for future emergency coordination.

Condition III - Hurricane winds are expected within 48 hours.

The Manager will review weather reports, inform key personnel of any significant changes and maintain liaison with Civil Defense and Coast Electric Power Assoc. Individual Homeowners should survey their property to be sure that all loose materials are removed or tied down. They should also stock up on canned goods and bottled water. If they have any propane tanks, they should be fully charged, get spare batteries for radios, candles, kerosene for lamps.

Condition II - Hurricane winds are expected within 24 hours.

Management will review all items listed under Condition V. Also, fuel tanks for all items of equipment and for all vehicles will be filled. Secure Clubhouse property. Individual Homeowners should secure their property in the event of Hurricane winds and fill the gas tanks of their vehicles.

Condition I - Hurricane winds are expected within 12 hours.

The Manager will send all employees home, keeping only those who might be designated as emergency personnel.

Individual Homeowners should adhere to the Pearl River County Emergency Management Orders.

V. POST EMERGENCY PROCEDURE:

When, after consultation with local Civil Defense authorities, the Manager has determined that the emergency has passed, he will tour the area to obtain a preliminary evaluation of damages. Crews should be assembled to clear roads of debris, etc. and Coast Electric Personnel should be called in to remove and replace/repair downed electric wiring.

Individual Homeowners should commence clearing debris on their lots, but taking particular precautions to avoid any downed power lines on their property or on roadways. These will be attended to as rapidly as possible by the Power Company.

In the event of lost of power and phones, communication center for management and the property owners will be through the guard house entrance by way of memos and signs.

Our water system has a backup generator but will be rationed as needed to conserve fuel.

FIRE SAFETY RECOMMENDATIONS

1. From a financial viewpoint - review and update fire insurance policy periodically.
2. Instruct your family in how to report a fire. Post the 911 number at phone.
3. Install Underwriters Laboratory (UL) approved smoke detectors (alarm system).
4. Keep sufficient amount of garden hose hooked to faucet to cover entire house. Protect water line and hose from freezing in the winter.
5. Extinguishers may also be installed. Preferable the "ABC" type to combat all types of fire.
6. Conduct family fire exit drills in the home. Know a secondary exit. In 2-story houses with upstairs bedrooms occupied by children consider installing rope ladders at the windows.
7. Conduct periodic fire inspection of your home.
8. Install screens on all fire places. Do not overload fire place. Do not use flammable liquids to start fires. Have chimney cleaned periodically.
9. Maintain all heating units in safe, clean, efficient condition, (suggest yearly inspection). Do not overload electric lines - use correct fuses only.
10. Keep property near the house free from weeds, brush, etc. Do not store flammable or combustible materials in home or garage.
11. Weekend or summer residents shut off all unnecessary electrical circuits before leaving.
12. Outside burning of any leaves, trash, etc., is restricted.
 - a. Lot owners must obtain permission to burn rubbish, leaves, trash, etc., by obtaining a burn permit from the lodge office.
 - b. Property owner must abide by the regulations of paragraph 49 of the HAWL Covenants:
13. The use of firearms including but not limited to pellet guns within the Hide-A-Way Lake Club, Inc., boundaries is prohibited except in areas that may be designated for such purposes by Hide-A-Way Lake Club.

SEPTIC SYSTEM MANAGEMENT PLAN

This management plan is intended as defining a framework in which the Citizens, Board, and Management of Hide-A-Way Lake (HAWL) can work together to improve the on-site treatment and disposal of septic within our community. This plan includes practices that will ensure that future systems are properly planned, designed, and built and also encourage systematic upgrading and maintenance of existing systems. On-site systems can operate properly for many decades with proper installation and maintenance. A sound management program with technical assistance, documentation, and enforcement is required for the overall good of HAWL residents.

The Board will have to take the necessary legal steps to incorporate certain parts of this plan into the operating rules or covenants. They must also resolve an equitable fiscal responsibility for the various services. Since the Pearl River County Health Department (PRCHD) has recently begun to assist in the site investigation, design, and inspection of on-site systems, the Board, Management, or a duty-appointed committee will interact with this authority to develop responsibilities and technical liaison with all concerned. HAWL may wish to promulgate stricter rules than the county because of the housing density and delicate ecology of our lake.

1. PUBLIC EDUCATION ACTIVITIES

The development of informational materials, informational HAWL meetings, and/or other media will inform our residents of the importance of properly maintaining their sewage system. This information must point out the financial and environmental consequences of not inspecting or pumping their systems.

2. SITE EVALUATION

This function is now under the responsibility of the County Health Department. The HAWL Manager, or his qualified designee, must be included in the application process. By being included from the beginning, the community will benefit from a “double check” on the integrity of new systems.

3. SYSTEM DESIGN

This function is now under the Pearl River County Health Department (PRCHD). HAWL must work closely with these professionals and may establish higher requirements than county minimums.

4. HAWL BUILDING PERMITS

No building permits will be issued for either new structures or remodeling involving plumbing changes, without a site evaluation report and system design approved and issued by the PRCHD. These documents will be included with the building permit request package submitted to the architectural committee, and will be maintained as part of HAWL records for a specific lot. The Manager will not forward a building permit package to the architectural committee without this information.

5. OPERATION AND MAINTENANCE

The success of the overall septic system management plan depends on sound management controls through periodic monitoring, pumping and documentation. It

also must detect improperly functioning systems and cooperate with homeowners and PRCHD officials in repairing or replacing these systems, obtaining water-quality samples, or any function necessary thereof to ensure that the system becomes operational.

Prior to approval of any mechanized or other non-standard treatment or disposal system, a maintenance manual must be provided to the HAWL management and the lot owner. This manual must include information regarding detailed inspection, maintenance, and repair procedures, inspection frequencies, repair parts list, system on plot, and supply source. It must contain all information necessary for the homeowner and HAWL to monitor the system's performance. It is required that the seller, installer, or designer of "non-standard" systems provide an annual/periodic inspection, in order to certify that the system is operating properly.

6. REHABILITATION OF NON-FUNCTIONAL OR SUBSTANDARD SYSTEMS

Some of the present systems were poorly designed, installed or maintained. An inspection program was developed to identify these systems. Once identified, HAWL Management must work in concert with the Pearl River County Health Department (PRCHD) and the property owner to find an acceptable restorative procedure.

SUMMARY

The Septic System Management Plan described herein is intended as a starting point toward a reasonable and practical means of dealing with on-site disposal of septage. The successful implementation of this plan will require the cooperation and support of all HAWL residents. We all came to HAWL to enjoy the lake and other amenities that this type of community offers. We all want to preserve those valuable assets. This program would be a critical part in maintaining the physical environment of the HAWL community.

HAWL Septic Tank Inspection Policy

Upon recommendation of the Mississippi State Health Department (MSHD), on January 18, 1995 the Board of Directors deemed it essential that all septic systems be inspected for efficiency every 3-5 years. This program was implemented in an effort to maintain our existing system. The inspection is done by the HAWL Inspector and there is a mandatory \$40.00 fee, which will be charged to your account.

In the inspection of your septic system, the tank inspection porthole cover will be removed and the tank will be checked for fullness, contents, structure and cracks. Your drain field bed area will also be examined. The inspection crew will take a great deal of care in replacing the port cover and any grass patches which may have been removed to get to the inspection hole. An index card will be left on the door indicating the findings of the inspection.

A follow up letter will be mailed if the septic tank or field drain is in need of repair. **Only if considered necessary** the tank will be required to be pumped out by a licensed Mississippi sewage disposal contractor. You may select a licensed MS sewage disposal contractor of your choice. You will be expected to pump/repair

such within a specified time frame and present documentation of such to the office for recording.

Written proof must be turned into the Hide-A-Way Lake Club Office so that it can be properly recorded and filed in your property owner's folder. This proof must be in the form of an invoice or receipt with the septic contractor's name printed on it and itemizing what has been done to the system. Should the septic contractor find that a problem does not exist, HAWL office requires this be in writing on either the septic contractor's letterhead or invoice.

If verification of repairs from a licensed Mississippi sewer contractor has not been received or contact with the office notifying us of the repair status has not been made by the requested deadline, we are required to submit to the Mississippi State Department of Health (MSDH) your name, physical and mailing address, and copies of all documentation reporting the septic system problem to you.

The MSDH will in turn conduct its own inspection of your septic system and report back to this office their findings. Unresolved septic system problem will be fined a \$200.00 weekly administrative fine, as per Hide-A-Way Lake Covenants, 44, beginning from the requested deadline until the problem is resolved.

HAWL Treatment Plant/Mechanical System Inspection Policy

As a Hide-A-Way Lake homeowner utilizing a wastewater treatment system, we like to inform you of our Treatment Plant Inspection Policy. This policy is based upon the recommendation of the Mississippi State Health Department to have a stricter policy on how treatment plants are inspected. Below are the specifics:

- HAWL will conduct unannounced inspections on a quarterly basis.
- The cost of a treatment plant inspection is \$7.50 and will be charged to your account.
- Upon completion of the inspection, an index card will be left on the door indicating the findings of the inspection.
- Should chlorine be required and not be present upon our inspection, you will have seven (7) calendar days to resolve this. As a courtesy, this will be the first and only warning for "no chlorine". On each inspection thereafter, a fine will be assessed if chlorine is not present. After seven (7) calendar days have elapsed, HAWL will re-inspect your treatment plant. The cost for the re-inspection is \$7.50 and will also be charged to your account. If the problem still remains, a fine of \$100.00 will be administered and charged to your account. This follow-up process will continue every seven (7) days until the problem has been resolved. Note: the fine will double upon every inspection where the chlorine is missing.
- Should a mechanical problem exist, you will have seven (7) days to resolve the problem. Written proof must be turned into the Hide-A-Way Lake Club Office so that it can be properly recorded and filed in your property owner's folder. This proof must be in the form of an invoice or receipt with the septic contractor's name printed on it and itemizing what has been done to the system. If documentation is not submitted by the deadline and contact has not been made with the office, a weekly fine of \$100.00 will be administered and charged to your account until the problem has been resolved.
